

PROVITA SUPPLEMENTS

ABOUT PROVITA SUPPLEMENTS

PROVITA SUPPLEMENTS is part of a family-owned group of companies that are committed to providing quality products to the agriculture industry since the 1930s. This German group is known for its extensive and cutting-edge research and development facilities, including a working farm for research and feeding trials. This allows us to test every product and back it with scientific findings to ensure a successful result for our customers and their animals. We research, manufacture and distribute mineral solutions, functional components and additives for the animal feed and silage industries, including BONSILAGE silage inoculants.

BUILDING BLOCKS OF SUCCESS

IN-HOUSE RESEARCH & DEVELOPMENT

Our in-house research and development department creates and intensively tests all of our products.

STATE-OF-THE-ART PRODUCTION PLANTS

Our state-of-the-art production plants are equipped with the latest technologies to deliver high-quality results.

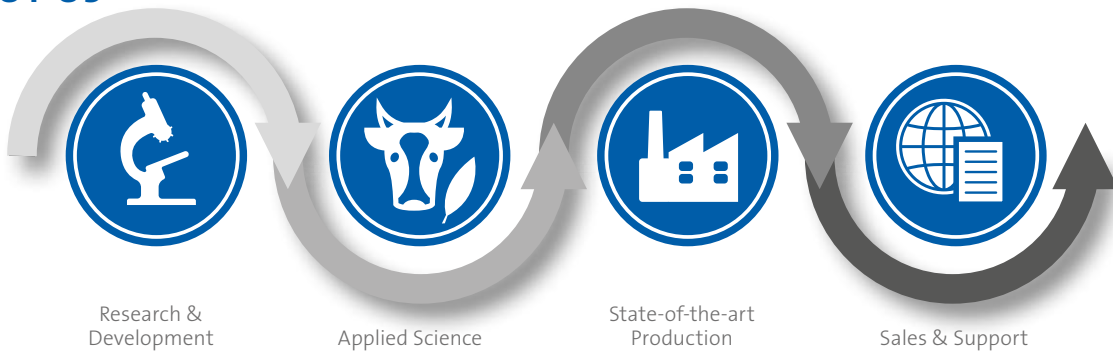

RESEARCH FARM FOR APPLIED SCIENCE

Our working farm for feeding trials allows us to test every product and back it with scientific findings.

ABOUT US IS ABOUT YOU

At **PROVITA SUPPLEMENTS**, we believe in putting our customers first. We have a shared goal of helping livestock and poultry operations produce healthy, productive animals, and we rely on our close relationship with our customers to guide new product research and development.

ABOUT US

PERFECT COMPONENTS. MAXIMUM RESULTS.

PRODUCT PORTFOLIO

MINERAL SOLUTIONS FOR EVERY NEED

An optimal mineral supply is of fundamental importance for health, growth and performance in poultry and livestock production. Our modern mineral production plants

produce innovative zinc, manganese, copper, iron and magnesium compounds, so we can offer individual solutions that deliver maximum results.

ANTIBIOTIC-FREE SOLUTIONS FOR GUT HEALTH

Natural control of pathogenic germs is becoming more and more important due to the continued reduction in antibiotic usage. **PROVITA SUPPLEMENTS** offers probiotic feed additives and acid mixtures for animal nutrition, feed

hygiene and cereal preservation to provide a wide range of highly effective solutions to promote a healthy immune system and optimal animal performance.

FUNCTIONAL FEEDSTUFFS FOR MAXIMIZED FEED UTILIZATION

Modern livestock nutrition must guarantee high zootechnical performance as well as cost-effective use of feed. **PROVITA SUPPLEMENTS** has developed an outstandingly effective

range of functional feedstuffs that boost digestion of fiber and starch fractions, stabilize digestive processes and, therefore, improve the general availability of nutrients.

TRACE MINERAL SOLUTIONS

MAXACTIVAT
activated zinc oxide

MAXLYSINAT
unique bis-lysines

MAXCHELAT
high-quality glycines

ANTIBIOTIC-FREE SOLUTIONS

MAXBIOS
spore-forming *Bacillus subtilis*

MAXLAC
well-proven gut flora stabilizer

MAXACID
acid mixtures for every need

FUNCTIONAL FEEDSTUFF

MAXFIBER
fungal fermentation product

MAXFERM
fungal fermentation product

QUALITY CERTIFIED

PROVITA SUPPLEMENTS continuously improves the quality and integrity of our products. We utilize quality management processes that are continually monitored and certified by independent and accredited organizations. In the end, our customers can be assured that every product

from **PROVITA SUPPLEMENTS** will deliver consistent, quality results.

Our company's quality certifications include GMP+ Feed Safety Assurance and QS, which demonstrate our compliance with core quality standards.
